

VISALIS[®] 500

Live your skills

The modular phaco and
vitrectomy system

Expand your image of phaco

**Introducing a new level of
flexibility and efficiency**

Just when you thought you knew everything about phacoemulsification and vitrectomy systems, along comes the new VISALIS® 500 from Carl Zeiss, placing the concept of phaco in a much larger context.

A modular phaco and vitrectomy system with a very flexible application range for anterior as well as posterior procedures: that's the new VISALIS 500. Designed with simplicity and efficiency in mind, the system combines exceptional ergonomics with a series of flexible performance drivers, including innovative MICS capabilities, a state-of-the-art dual pump and ultrasonic technology as well as ultra-high speed vitrectomy. Combined with CALLISTO eye[®]*, it is integrated into the clinical workflow, adapting itself to your surgical style. As a single-system surgical solution for phaco as well as vitrectomy, it offers tremendous investment security – now and in the future.

* The connection of all VISALIS 500 systems to CALLISTO eye are not currently available. For more information, please contact your regional distribution partner.

I of surgical convenience,

Combine VISALIS 500 with the OPMI LUMERA® 700 microscope, CALLISTO eye* and the broad range of ZEISS IOLs, the innovative BLUEMIXS™ 180 injector and OVD solutions to the cataract workplace. Add RESIGHT® to create the retina workplace. The new VISALIS 500 phaco and vitrectomy system complements both workplaces – designed as much for enhanced safety and efficiency as for superb patient and surgeon comfort.

In other words: designed to let you live your skills.

Your choice of surgical procedures and pump technology

VISALIS E 500

VISALIS E500*

Cataract surgery convenience

Equipped with advanced functions such as a rise-time controlled peristaltic pump, **VISALIS E500*** brings superb convenience and efficiency to cataract procedures while also setting new standards in reliability and patient safety.

* VISALIS E500 is not currently available.

VISALIS S 500

VISALIS S500

Cataract surgery flexibility

In addition to unsurpassed reliability and patient safety, **VISALIS S500** offers tremendous utilization flexibility in the OR with its dual peristaltic/venturi pump and vitrectomy upgrade capability.

VISALIS V 500

VISALIS V500

Cataract and retina surgery

With extensive cutting-edge technologies, including a dual peristaltic/venturi pump system and ultra high-speed vitrectomy capabilities, **VISALIS V500** redefines cataract and vitreo-retina surgical workflow.
